## Axle-IT's Asset Intelligence Connector

TOPdesk certified

# Why the Axle-IT Asset Connector?

## Business & IT triggers

* TOPdesk's proprietary **TOPsis** solution **= End-of-Life.**
* **New:** TOPdesk – SaaS development.
* **Ongoing need** to mitigate intensive manual inventory processes.
* **Ongoing need** to keep track of ever changing asset information.
* **Ongoing market demand** for standardized "out-of-the-box" CMDB integration & automation solution.
* **Ongoing need** to improve productivity, to optimize cost, and to improve efficiency.

# Questions Asked by IT

How many devices in our organization and where are they located?

How can I view asset data from other sources?

What should I budget for hardware/software replacement?

Do we have warranties expiring within the next 90 days?

When did we purchase this system? For how much?

How can I monitor my printer status?

# The first 5 controls

CIS, US-CERT, ASD, and other authorities prioritize these five elements of cyber hygiene to significantly reduce security threats.

**Connector:** inventory and control of hardware assets

**Connector:** inventory and control of software assets

**Complementary solution:** continuous vulnerability management

**Complementary solution:** controlled use of administrative privileges

**Complementary solution:** secure configuration for hardware & software
